TECHNICAL SERVICE & SUPPORT

To our way of thinking, adding value to our customer relationship requires that we know our industry inside out. Like any business, the printing industry is dynamic and constantly evolving. Armed with the expertise and insight gained from years of experience, in-depth involvement and continuing education, we can help our customers deal with the future as well as the present.

- MGI phone support from certified support specialists.
- Online phone support and troubleshooting for dealer supplied products.
- Providing customers with with manufacturer based support lines if required.
- Consultation on workflow concerns and issues.
- Demonstration of products and workflow.
- Demo rooms, webinars and seminars.
- Sample output on printers, plate setters and film setter (pre-sales support).
- Information on manufacturer upgrades and patches.

Supplying Graphic Insight

Ernest Green & Son Ltd.

Today's markets demand digital printing that is fast, flexible, and efficient. Variable print must integrate seamlessly with pressure sensitive labels, holograms, tipped-on cards, multi-layered documents, foil materials, and a wide-range of diverse substrates and configurations.

Nipson's Technology

Nipson develops and manufactures printing solutions that meet the quality, speed, reliability, cost and variable content requirements of the high speed black and white digital printing market.

The Nipson's printing systems have new technology - magnetography that uses a magnetic print drum and a magnetizing print head array, combined with flash toner fusing.

Magnetography provides high printing speed and application flexibility, which gives an opportunity to print on a wide range of substrates, and is designed for production environments.

Nipson's Equipment

- **The Nipson VaryPress 200** - speeds up to 90 m/min (295 ft / min) on a printable width of 18.45" produces over 600 A4 pages per minute.
- **The Nipson VaryPress 400** - speeds up to 125 m/min (410ft / min) on a printable width of 18.45" produces over 840 A4 pages per minute.
- **The Nipson 1865** - continuous form laser printer produces crisp, black-and-white output on a variety of media with print width up to 17".
- **The Nipson ST20 Stacker** - accepts a large range of paper formats, up to 20.5" wide paper and up to 17" long sheets, accommodates a large variety of media.

MGI has become a pioneer in innovative digital thinking, providing a line of unique solutions enabling graphic professionals to integrate in the traditional workflow, digital solutions that could print both Paper & Plastic Substrates.

MGI Equipment

- **Meteor DP40 Pro** prints on paper and plastic.
- **UFA3** is a standalone, complementary unit with interchangeable, modular tools.
- **UVarnish** is an Offline Auto Feed UV and IR Coater system for paper and plastics substrates digitally or offset printed.
- **The PressCardPro** is an industrial production unit dedicated to the lamination of plastic substrates.
- **MeteorSmart** allows you to produce all of your personalized applications on formats and substrates.
- **PowerLam** is a high speed double sided Hot Roll Laminator for digital toner based output on a wide variety of substrates.

Media

- **Paper Applications**
Matte & Glossy Paper, Kroamcoat, Bristol, Art Paper / Transparent, Envelopes & Adhesive Labels
- **Plastic Applications**
Standard PVC, Polycarbonate, Polyester, Teslin, Vinyl
