

:AgfaJet Media for large format digital printing

# :AgfaJet

## Assortment Overview

April 2004

The :AgfaJet media are designed to deliver top quality for a variety of inkjet applications. Backed by Agfa's expertise in colour management these media render an excellent image quality for poster production, point of sale, aerial photography, mapping and other applications.

**Universal Instant dry Photograde Paper (UIPP) - Glossy and Satin:** Heavy-weight, high quality instant dry nanoporous photo-base RC paper for brilliant, high contrast, photo-like images (170 g/m<sup>2</sup> and 250 g/m<sup>2</sup>).

**Universal Photograde Paper, dye (UPPd) - Glossy and Satin:** special photo-base RC paper for all printers with dye-based inks (except Epson 10000), for brilliant, high contrast, photo-like images (165 g/m<sup>2</sup>).

**Photograde Piezo Paper (PPP) - Glossy and Satin:** special photo-base RC paper for use with a variety of piezo printers. For brilliant, high-contrast, photo-like images (165 g/m<sup>2</sup>).

**Photograde Paper Eco-Solvent Plus™, (PPES) - Glossy and Satin:** Photograde RC paper for Eco-Solvent Plus printers. Excellent photo-realistic colour saturation.

**Poster Paper (POP) - glossy:** instant dry quality paper for high quality prints (175 g/m<sup>2</sup>).

**Premium Paper (PP) - 90 g:** High-quality coated inkjet paper for premium quality presentations, colour graphics and poster prints with low to medium ink coverage. Also available in self-adhesive version (PP-sa).

**Premium Paper (PP) - 120 g and 170 g:** high quality coated inkjet paper for medium to high ink coverage. Ideal for advertising, photo and poster printing.

**Universal Wet Strength Paper (UWSP):** white, waterfast, matt paper with blue back for increased opacity, for general use. Provides vibrant high quality images with good colour saturation on a white background (130 g/m<sup>2</sup>).

**Universal Backlit Film, dye (UBFd):** photographic polyester (PET) inkjet film with white back-coating. High scratch resistance, universal inkjet material for wrong reading prints. Fast drying allows easy handling for greater productivity. Excellent colour saturation for photo-realistic images in light boxes (thickness 120 µm en 210 µm).

**Universal Frontprint Film (UFF):** polyester (PET) inkjet film with a water-resistant inkjet coating for outdoor and indoor use in light boxes (thickness 120 µm and 210 µm). With macro-porous technology for instant drying.

**Premium Vinyl (PV):** Flexible, high-quality vinyl with self-adhesive back for large format graphics with highest image quality for indoor and outdoor use (310 g/m<sup>2</sup>, thickness 290 µm). With macro-porous technology for instant drying.

**Universal Canvas (UCV):** high-quality canvas-based material with special coating. Ideal for art and painting reproductions and stage decoration (340 g/m<sup>2</sup>, thickness 400 µm).

■ = Eco-Solvent Plus™ inks only

● = Dye-based inks

▲ = Pigment inks

■●▲ = compatible

●▲ = compatible with ink limitation. Print an ink limitation test to avoid problems.

(1) = Only in sheets

(2) = not recommended for Epson 10000

(3) = Pigmented ink recommended for outdoor use
