

:CopyJet

Inkjet film for digital prepress systems, screen printing and sign making

:CopyJet is a specially formulated instant-dry film for screen and sign printing up to A2 in size. The film's high density gives maximum ink acceptance and can be used on different types of desktop inkjet printers.

With :CopyJet film you can make your film separations in-house, giving you full control over your digital workflow.

:CopyJet

:CopyJet Film - The superior film for screen and sign printing.

Developed specifically for screen printing, :CopyJet film is ideal for making in-house film separations with low-resolution black text and halftone images. Simply put the :CopyJet film into an inkjet printer and out come film positives up to A2 size!

:CopyJet film gives

- Easy, instant-dry, digital output on film in full daylight conditions.
- Total control over in-house digital workflow and film production.
- Very good water resistance.
- Low investment and low operating cost.

:CopyJet films have a special ink-receiving layer for optimum ink acceptance and density. Their stabilised polyester base provides the highest accuracy in various types of plotter. The films also offer an instant dry image and a very good water resistance. They can be used with many of the currently available black dye and pigmented inks.

Plotter types

:CopyJet films can be printed on many types of printer. A good image quality is obtained from an Epson Stylus 2100 printer with its own standard black ink (TO341) and its own driver. We recommend using the standard black inks supplied with the printer.

Photographic characteristics

- Low Dmin: visual 0.06, UV 0.12
- High Dmax: depending on the driver or RIP settings and the type of ink. A UV-Dmax up to more than 3.5 can be achieved for high quality, sharp screen exposures.
- Excellent image sharpness.
- Good ink coverage gives solid blacks.

:CopyJet Film printed on Epson 2100

Physical characteristics

- Special layer for good ink acceptance with dot and line spread control.
- Accepts dye-based and pigmented inks.
- Matting grains for good vacuum and better image copying. Prevents sticking and ink transfer between emulsion and back.
- Good dimensional stability.
- Excellent drying characteristics, instantly dry after plotting.
- Good water resistance.

Assortment

The film is available either in standard sizes or as special sizes. Standard sizes are: 21 x 29.7 cm; 29,7 x 42 cm; 33 x 48,3 cm; 42 x 59.4 cm.
